

# Your best BUDDY

With BUDDY your staff can omit extra steps. Attach the Eurodispenser 3 flex along your most efficient care route – for example at the patient bed or on your trolley.

## What makes the dispenser so intuitive to use?

- Install it without tools
- Position it horizontally or vertically with a sliding clamp
- Rely on a robust stainless steel wire construction
- Choose between 500 ml and 1 L dispensers for different Euro bottles
- Autoclave it for thorough hygienic cleaning
- Optional drop catcher allows for clean applications without soiling the floor
- Facilitate your workflow by simply replacing the bottle when empty
- Attach it with 360° flexibility to patient beds, drip stands or trolleys
- Sterillium constantly travels with the patient bed – for example to the PACU

# Earn your patients' trust

## More dispensers

More smart and convenient hand disinfectant dispensers directly at the point of care – that's our mission.

More dispensers  
-  
More use of Sterillium

## More use of Sterillium

Install the Eurodispenser 3 flex almost anywhere. Use more Sterillium when the dispenser is within arm's length.

## More hand disinfection

Sterillium and a smart dispenser – the hygiene match. It's a scientific fact that proper hand hygiene aids in reducing infection.<sup>1</sup>

More hand disinfection  
-  
More compliance

## More compliance

The WHO demands compliance to the 5 moments of hand hygiene.<sup>1</sup> Sterillium works hand in hand with medical facilities to increase hand hygiene.

## More confident staff

How do we boost the trust of caregivers? With a smart dispenser along the user care route.

More confident staff  
-  
More healthy patients

## More healthy patients

What increases the trust of patients? Experiencing the care of staff when it comes to hand hygiene. The benefits: fewer infections and better health.

## More positive word-of-mouth

Use hand hygiene compliance as a positive talking point. This can be a deciding factor to recommend your hospital.

More positive word-of-mouth  
-  
More patient retention

## More patient retention

Patient retention is key. Content patients are more likely to return to your facility.

Disinfection

# Patient safety first

## Discover a smarter point of care

Introducing BUDDY, the Sterillium Eurodispenser 3 flex, and BUTLER, the Sterillium Wallholder Plus

# Hand hygiene can be so simple

The WHO hand hygiene moment 2 „before aseptic procedures“ is a top priority for patient safety.<sup>1</sup> Disinfectants ready within arm's length facilitate frequent use during staff working procedures. That's why we invented BUDDY – an intuitive dispenser always by your side. In a study at the Charité<sup>2</sup> the BUDDY Eurodispenser 3 flex was attached to every infusion stand in the intervention ward as one part of the multimodal intervention showing remarkable results: significant increase of hand hygiene compliance before aseptic tasks and one third less blood stream infections on intervention wards compared to control wards hinting on the influence on infections.

Apply  
anywhere,  
anytime.

# Intuitive dispensers – ready to apply anywhere, anytime

More smart and convenient hand disinfectant dispensers directly at the point of care – that's the mission we want to accomplish hand in hand with you.

Install the Eurodispenser 3 flex nearly everywhere. At the patient bed or at the trolley. Use more Sterillium when the dispenser is within arm's length.

Apply  
anywhere,  
anytime.

Mount the  
BUTLER on  
any wall.

# Your convenient BUTLER

Mount the newly designed Sterillium Wallholder Plus almost everywhere in hospital rooms. The convenient BUTLER simplifies your hospital processes.

BUTLER is the perfect stationary companion to the mobile BUDDY.

## A disinfectant holder you can rely on

- Mount it on any wall
- Dispenser firmly holds 350/500 ml BODE bottles
- Optional drop catcher allows for clean applications without soiling the floor
- Use an easy to see and ergonomic dispenser
- Save space thanks to slim design
- Facilitate your workflow by simply replacing the bottle when empty
