

HARTMANN

Reviving foot spray. Cooling care and athlete's foot prophylaxis.
Cutasept® feet

Cutasept® feet

Advantages at a glance

- vitalizing freshness for tired feet
- helps to prevent athlete's foot
- acts reliably in 30 seconds against dermatophytes, yeasts and bacteria
- skin friendly, fragrance- and colourant-free

Directions for use

Cutasept® feet is a skin-compatible solution that is sprayed undiluted onto the skin. The foot spray is fitted with a practical upside-down spray pump and is suitable for the following applications:

• For tired feet

Cutasept® feet foot spray cools and revitalizes the feet, e. g. after tiring work involving standing, after sport, or when heavy shoes have to be worn for a prolonged period. Spray on generously for 30 seconds and allow to dry.

• Supportive for the prevention of athlete's foot

The problem: There is constant reinfection and the fungi can also be transferred to other parts of the body. Cutasept® feet helps to prevent first infections. The preparation is sprayed undiluted onto the skin.

A saturated wetting should be ensured during the exposure time of 30 seconds.

Area of application

Cutasept® feet provides cooling and refreshing care and gives stressed feet an invigorating feeling. At the same time, regular use can help to prevent athlete's foot. There is a high risk of contracting athlete's foot, especially in areas where people walk barefoot or without shoes, e.g.

- washrooms and shower rooms
- swimming pools
- saunas
- changing rooms
- fitness studios
- solaria
- hotel rooms

In addition:

- in case the same footwear, such as rubber boots, work shoes, gym shoes, is worn for a prolonged period
- in case the same socks are worn for a prolonged period.
- in case footwear is hired, e.g. bowling shoes, ski-boots, etc.

Composition

Isopropyl Alcohol, Aqua, Benzalkonium Chloride
